

JOEL RIGGING

COUNTERWEIGHT STORAGE BENCH

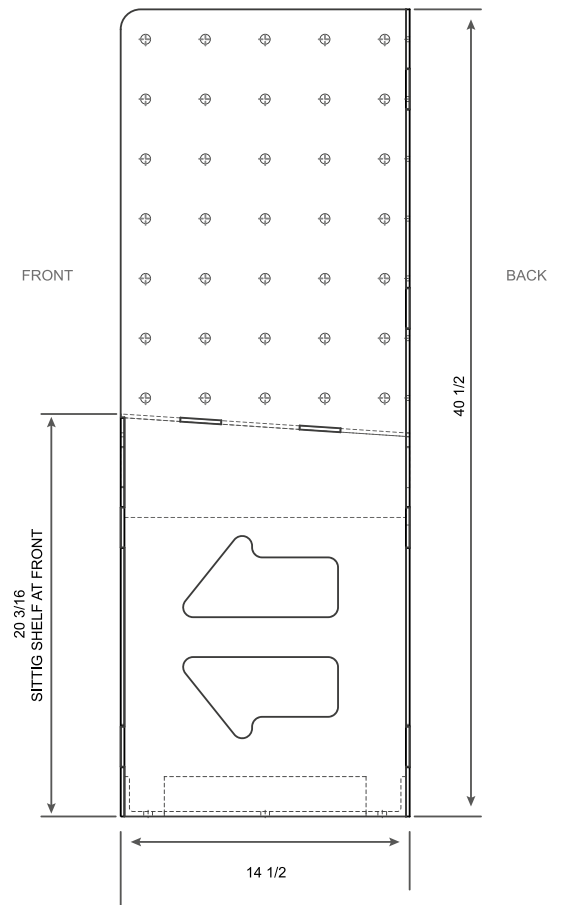

JOEL Counterweight storage bench stores counterweights safely and improves working conditions on the loading gallery. Storing the weight so that bending is reduced while loading/unloading sets increases operator comfort and reduces chance of injury. The JOEL Storage bench also helps keep the loading gallery floor clear of materials/debris.

The Standard configuration comes with:

FEATURES

- Capacity, 2500 lbs
- Bench is sloped to reduce risk of weights falling
- Full height back and sides prevent weights falling
- Back is perforated the same pattern as peg board, providing optional storage for tools.
- Standard width 48". Custom widths are available
