

JOEL RIGGING EMERGENCY RELEASE SYSTEM

Manual Fire Curtain Release Mechanism

JOEL Rigging Fire Curtain Release mechanism, maintains tension in the fire curtain release system. In the event of an emergency, manually releasing the device will cause the fire curtain to close automatically. This is to be installed as part of a complete Fire Curtain system. Can be installed on manual and motorized fire curtains, in line with the Fire Alarm connection and fusible links to provide 3 layers of protection.

System is manually resettable by the operator and no special training is required.

The Standard configuration comes with:

FEATURES

- Push the handle to the left to release
- Pull down on the handle to reset
- Wall mounted
